for one unit

Second hand
Computer Controlled Pipe Profile Cutting Machine
Type RB 950/1500 EL AGD with 5 Axes

1. General Information

- This second hand machine is perfectly tailored to the needs of contractors in the oil and gas business to profile pipes with acetylene / oxygen for following pipe data:
 - Diameter range: 100 mm – 1,524 mm
 - Length: 500 mm – 6,000 mm
 - Wall thickness: 5 mm – 60 mm
 - Max. pipe weight: 9,000 kgs
- The machine was built in 1985 and refurbished in 2001. After refurbishment the machine was only used for further 850 operating hours.
- The machine is in good shape and will be sold after final checks and after integration of a new computer system and after exchange of the complete torch carriage track with a warranty period of 3 months after shipment ex our works in Opladen.
- The machine can be delivered within 10-12 weeks after having received the purchase order, the advance payment and the final payment.
