Introduction

Tusker Engineering FZC has been active in the UAE since long time, providing fabrication and site construction activities comprising of structural fabrication, plate work, vessels, pipelines and all type of mechanical erection, blasting and painting works for the projects such as Petrochemical, Cement, Power, Oil and Gas Sectors, Industrial plants, and Food Industries. Also undertake structural steel fabrication of bridges, multistory buildings and large commercial buildings.

Tusker Engineering Corporate office and Fabrication facilities are located in the **Hamriyah Free Zone (HFZA) Sharjah UAE**

The company managed by team of highly experienced professionals in the field, undertakes detail engineering/shop drawings for tanks/vessels & structures/cladding. adequate skilled technicians, qualified & experienced engineers and supervisory staff with proven track record of executing sophisticated projects.

We are working for leading construction companies and consultants in Dubai, we have recently worked on Sheikh Zahed Road Bridges with **RTA (Road & Transport Authority), PARSONS.**

District Cooling Plants in PALM Jumairah Island with **Hyder Consulting**

Development of Fuel Tank Forms with **HALCROW Yolles**

Our Main Activities

Supply, Fabrication, Surface Treatment & Installation of Steel Structures Pipelines & Equipments:

Tusker Engineering has fabricated and erected a large

volume of steel structures, equipment, pipe work and Plate work for various industries. (Carbon steel, alloy steel & Stainless Steel) for various industries viz. Cement, Power, Petrochemicals / Chemicals, Food Processing industry, etc.

Blasting and Painting and Coating Services

Tusker has in-house facility for blasting and painting of fabricated items and also carries out if required field painting work at the erection site. Tusker has very close association with big Galvanizing yards can undertake galvanizing of structural steel of up to 12 Mtrs Long and 3 Mtrs. wide fabricated structures by single dip process.

Tusker Engineering is committed to:

- The Pursuit of Excellence
- Total Customer satisfaction
- Delivery as per agreed completion schedule.
- Most economical price by controlling our overheads

Tusker Engineering is not just another Fabrication and Erection company; it is a whole new kind of professionally managed engineering company. **The kind that never promises any more than it can deliver and never delivers less than it has promised.**

Mission Statement

Diligently pursue the development and consistent delivery of quality product and service to our clients. Deliver the product and service faster, smarter, and better than the competition. Exercise exemplary corporate citizenship to the community and create an environment in which we promote and reward employee contribution. As a Fabrication and Erection entity, our mission is to achieve superior long-term company financial value.

Core Values Statement

We believe our business is built upon a commitment to teamwork and to these Core Values:

- ☐ Absolute Customer Satisfaction
- ☐ Honesty & Integrity in All Aspects of Business
- ☐ An Unrelenting Pursuit of Excellence
- ☐ A Safe Work Environment
- ☐ Respect & Concern for Each Employee
- ☐ Community Involvement

Range of Services

We take pride in introducing ourselves as one of the professionally managed engineering products and services company catering to the technical needs of various sectors.

Tusker Engineering FZC built on 15,000 Sq. Mtrs, area in the Hamriyah Free Zone Phase II, has a fully equipped fabrication unit for steel structures, storage tanks, pipe lines and engineering products for oilfields, refineries, food, Chemical, Cement, Power plants has an excellent team of highly qualified and experienced staff from different disciplines, capable of handling a wide variety of engineering to the internationally accepted standards and quality.

Our aim is to give quality our skills experience and professionalism to our client's business goals and objectives.

We have the expertise of the latest technology in the cut and bend line, Coils cutting line, Profile cutting, rolling of plates in cylindrical and conical forms are quite confident of meeting all expectations regarding Job execution, Quality control and schedule.

Engineers ■ Fabricators ■ Erectors ■ Steel Trading

Range of Services

1. Light and Heavy Structural Steel Work

- Industrial Fabrication
- Ware houses
- Cranes
- Crossovers
- Staircases, Ladders, Walkways and Hand Rails

2. Light and Heavy Plate Fabrication Work

- Ducts & Chutes
- Bins & Hoppers
- Bag Filter Casings
- Fan Casings
- Conveyors
- Bucket Elevators
- Storage Tanks
- Media Filters
- Pressure Vessels

3. Pipe Line Fabrication and Erection Work

- Carbon steel pipelines for oil, gas chemicals, steam, air and water lines
- Stainless steel pipelines for water treatment and chemical plants
- Alloys steel pipelines for steam and oil
- Fabrication of large diameter pipelines for sewerage and water line.

4. Surface Treatment, Painting and Galvanizing

- Grit blasting of structural steel and plate work as NACE & SSPC Standards.
- All type of epoxy painting, Enamel painting with airless spray system.
- Galvanizing (facilities available with associate company)

Our Safety System

A safety and environmental philosophy is normally developed for the project. It is formulated to ensure that hazards, which can affect the safety of the personnel, the integrity of the facilities and the conservation of the environment, are properly and adequately considered. In doing so, all are introduced onto the execution of work to ensure the retention of good and well proven engineering practices throughout.

Probable hazards are established by comprehensive analysis. The appropriate safety and environmental systems and procedures are then incorporated into the project.

The principal objectives are:

- ☞ To provide a safe working environment for personnel
- ☞ To minimize the potential of hazardous occurrence.
- ☞ To avoid exposure to the potential hazards
- ☞ To contain or minimize the effect of hazards
- ☞ To provide means of escape from hazards
- ☞ To provide environment protection.

Safety manual guidelines

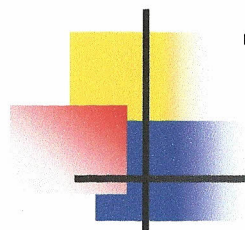

The main provisions of the safety manual that Site Manager will distribute, after Owner's approval to all field personnel are summarized in the following subsections :

- ☞ Personal protection equipment
- ☞ Fire prevention
- ☞ Mobile equipment and rigging practices
- ☞ Excavation and form practices
- ☞ Ladders and scaffolding safety
- ☞ Transportation safety.
- ☞ Radiography
- ☞ Work permits
- ☞ Housekeeping
- ☞ Emergency situation
- ☞ Reporting of accidents
- ☞ Procedure to obtain first aid / assistance for injuries.
